

POSITIVE THINKING AND CONSCIOUS CREATION

Our life forms itself in accordance with the way we see ourselves in the world. The quality of our lives is determined by our thoughts IN EVERY ASPECT. Through the scientific explanation of the thought's creative energy we become aware of the processes that happen in our bodies. It also suggests how we should influence the events that happen to us.

With the help of conscious and positive thinking we are able to control the events of our lives. We are able to experience the divine creative force that we have in ourselves. We own this quality thus we can create good things both for us and the world. We are the ones who hinder our desires from being fulfilled because we don't believe in ourselves. This way we also stop those events happen that we actually would like to happen.

The course helps the participants understand that we play an important part in what's happening to us (illness, accident, any event). In the course knowledge is transmitted that describes the way of how to form changes in our lives. In the fields of health, relationships, work, abundance etc. the conscious creation can be applied everywhere. The contents of the course is understandable for everyone and it is taught to be easily applied in practice.

The topics of the course:

- The man's anatomy in holistic way.
- The role of the right and left brains.
- Understanding of the ego in the mirror of the working of the Self
- The proofs of the creative force of the thoughts.
- The importance of acceptance.
- Positive thinking defined as the representation of the human wholeness.
- The exercises done during the seminar are to help to acquire and experience the theory, too.
